

Industrial

hansson•nips

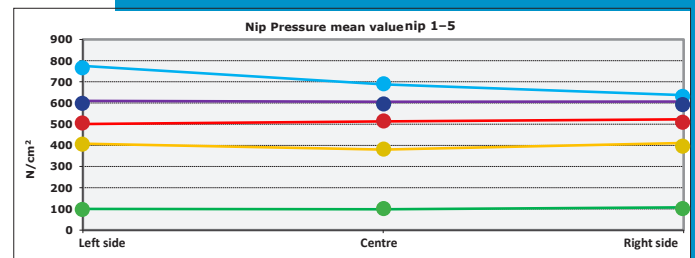

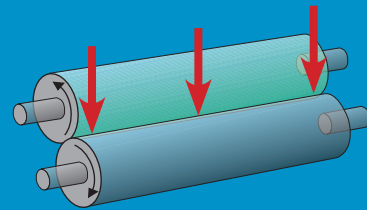

Software for trend analysis
and control of roller nips

Without statistics no control!

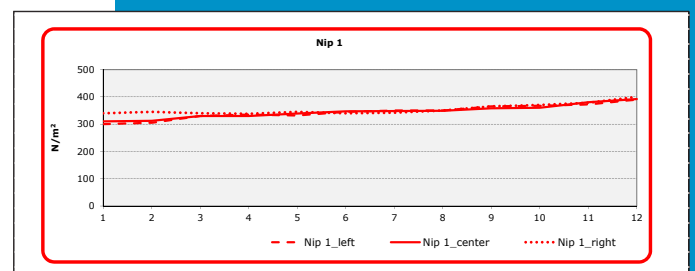

Control by numbers makes it possible to

- identify and eliminate problems
- monitor the process
- communicate process settings

- measure nip width
- measure nip pressure
- up to five nips
- register settings for both ends and centre of nips

- get trends over time

Measures in mm

Nip Width Indicator for nip width
(formerly Roller Nip Indicator)

Measures in N/cm²

Pressure Indicator for nip pressure

- based on Excel
- easy to handle
